WORK EXPERIENCE

Senior Product Developer Lumel Technologies Inc.

01/2024 - Present

Hybrid, Chennai

- Spearheaded the development of cross-visual data transfer functionality in Power BI, enabling seamless collaboration between visuals, improving user efficiency.
- Achieved a 40% reduction in query execution time by implementing advanced techniques such as table filters, hashing, and stored procedures.
- Directed the migration of Power BI applications to web platforms, significantly expanding usability across desktop and mobile platforms.
- Made strategic technical decisions for major product features, conducted comprehensive code reviews, and ensured delivery ahead of deadlines to meet project milestones.

Associate and Product Developer Lumel Technologies Inc.

01/2022 - 12/2023

Remote, Chennai

- Designed reusable UI components, reducing development time by 55% and implemented highly optimized data grid solutions using react-table and ag-grid for improved data rendering.
- Enhanced front-end performance with deferred data fetching, virtualization, lazy loading, and advanced state management using Pub/Sub patterns, message queues, and Redux.
- Developed a custom formula engine, improving computational accuracy and integrated TypeScript and Storybook to boost code safety, maintainability, and UI testing/documentation efficiency.
- Fixed high-priority bugs, improving product stability and maintaining a 99.9% reliability score.

BI Developer Intern and Trainee Visual BI Solutions Inc.

03/2021 - 12/2021

Remote, Chennai

- Built modular React components and interactive D3.js-based data visualizations, improving front-end performance and analytical capabilities by 35%.
- Contributed to CI/CD pipelines, enabling 20% faster deployment cycles, and collaborated effectively using JIRA and Git for seamless project management.
- Engineered advanced mathematical computations for analytical tools, delivering actionable insights and an enhanced user experience.

EDUCATION

BE (CSE - Chennai Anna University) Government Engineering College (GEC), Erode

07/2017 - 03/2021

First Class

SKILLS

JavaScript (TypeScript , React, Redux, Next, Node, Express, Socket)

Web Dev (HTML, CSS, Tailwind, Sass, PostCSS, SEO, Lighthouse)

UI (Bootstrap, MaterialUI, Chakra UI, shadcn, Framer motion)

Python (DSA, Tkinter, Flask, Script)

ORM (TypeORM)

SQL (MySQL, Postgres, Sqlite)

NoSQL (Mongo, Firebase, Redis)

Test (Jest, Cypress, Pytest , Puppeteer)

Build (Webpack, Vite)

APIs (REST, GraphQL, Postman, Swagger, CORs, JWT, OAuth)

Control (Git, GitHub Actions, Circle CI, Azure, Docker, Vercel)

Quality (Refactor, JsDoc, ESLint, Prettier, Storybook, Pylint, Husky)

Tools (Jira, Figma, Notion, Copilot, Chrome, Teams, VSCode, Wrap)

Dedication, Responsibility, GoGetter, Insightful, Mentorship

ACHIEVEMENTS

Received the "Out of Box Thinker" award in Lumel Technologies

Led high-performing team, improving collaboration and efficiency.

Resolved 20+ critical customer issues through priority analysis and swift delivery, enhancing customer satisfaction.

PROJECTS

BI Web Apps [TypeScript, React, Node, TypeORM, Redis] (~4yrs)

- Developed user-friendly Power BI products (ValQ and Inforiver) with advanced visualizations like trees, graphs, charts, and tables. Added features for calculations, data aggregation, write-back capabilities, and enhanced reporting, improving usability and boosting user satisfaction.

Management Web Apps [Python, Flask, React, SQLite] (~2yrs)

- Developed comprehensive management systems for passport and bus ticketing, enabling online search and interactions. Utilized Flask for backend and either Tkinter GUI or React Webpage for dynamic frontend. Integrated payment processing and email notifications to enhance user experience and streamline transactions.
